MUSC Health Transplant Center

Specializing in organ transplant for more than 20 years, The Medical University of South Carolina is home to the only comprehensive organ transplant program in South Carolina. With some of the nation’s most experienced transplant surgeons, our transplant center provides patients with short wait times, excellent outcomes, a convenient location, state-of-the-art technology and facilities, and patient-centered care. MUSC’s reputation for patient safety and quality is well-known throughout the southeast and beyond. Through our dedicated efforts in education, research and our innovations in clinical medicine, we are changing what’s possible in adult and pediatric transplantation.

About Us

- Hospital Admissions*: 269
- Outpatient Visits*: 17,508
- Patients Served Statewide*: 256

*fiscal year 2012

Overview of Programs

Clinical Strengths

- 2012 Department of Health and Human Services bronze transplant awards (heart, kidney, liver and lung)
- Only heart, kidney, liver and pancreas transplant programs in South Carolina
- One of just a dozen islet cell autotransplantation centers in the world
- Heart, kidney, liver, pancreas and lung programs certified by the United Network for Organ Sharing (UNOS) and the U.S. Center for Medicare & Medicaid Services (CMS)
- Features some of the nation’s shortest transplant waiting times, especially for liver and lung transplant patients
- First, largest and most comprehensive blood and bone marrow program in the state
- South Carolina’s only approved umbilical cord blood transplant program
- Certified by American Society of Blood and Marrow Transplantation (ASBMT) and Foundation for Accreditation of Cellular Therapy (FACT)
- Member of the National Kidney Registry, and participant in national paired exchange program
- State-of-the-art facility, including intensive care unit, operating rooms, labs, interventional radiology and endoscopy suites, private rooms, concierge service, valet parking and dining

Research

As an academic medical center, MUSC participates in many national clinical trials, offering the newest therapies and translating basic research into applications that immediately benefit patients. Our physicians lead and participate in many clinical research programs. Our robust clinical research program focuses on maximizing donor pools, reducing organ rejection and improving outcomes.
