Botox®, Xeomin®, Dysport®
A simple procedure that uses purified proteins to relax muscles that cause wrinkles. Treatments have the ability to improve existing wrinkles and slow the development of new wrinkles. A number of areas can be treated including: forehead, between eyebrows (“11s”), eye area, lip lines, chin, frown area, jaw-line, neck, and underarm area (to minimize sweating).

Fee: $10-12/unit

Soft Tissue Fillers: Juvederm®, Voluma®, Restylane®, Restylane® Lyft, Restylane® Silk, Radiesse®, Belotero®
“Game-changers” in the treatment and prevention of the signs of aging. Soft tissue fillers offer a simple non-surgical option that addresses major components of the aging process – skin thinning and volume loss. Results are immediate. Areas that can be treated include cheeks, lips, lip lines, under-eye “circles”, chin, jaw-line, temples, forehead, neck, chest, hands and even earlobes. Many different soft tissue filler options exist. Selection of the best option for your needs requires expertise and will be determined during your visit.

Fee: $600-750/syringe

Sculptra Aesthetic®: Collagen Stimulator
Sculptra® is a unique collagen stimulator that can address facial volume loss and thinning skin, restoring a more youthful appearance. A series of treatments may be required for optimal results.

Fee: $700/treatment

Kybella®: Under Chin Fat Reduction
Kybella® is a non-surgical procedure that has revolutionized the treat excess fat under the chin, or what is commonly referred to as the “double chin”. The procedure is simple, involving a series of small injections of a naturally occurring molecule that dissolves fat cells.

Fee: $1,000-1,200/treatment

Pulsed Dye Laser
Pulsed dye laser is an effective treatment to improve uneven skin tone due to “broken” or prominent blood vessels, “spider veins”, non-cancerous vascular lesions, or ruddy discoloration sometimes caused by rosacea.

Fee: $100-500

Vanquish ME™: Fat Reduction & Body Contouring
Vanquish ME™ uses radio-frequency technology to non-invasively and selectively destroy fat cells. Treatment is painless and requires no “down-time”. A large area or multiple areas can be treated simultaneously. Potential treatments sites include the abdomen, flanks, “love handles”, back, “bra fat”, and thighs. Optimal treatment typically involves 4-6 sessions.

Fee: $550-2,500

Exilis Ultra™: Skin Tightening, Body Contouring, Cellulite Reduction
Exilis Ultra™ is a non-invasive treatment for skin tightening, body contouring, and cellulite reduction. It is the only non-invasive treatment that combines both ultrasound and radio-frequency technology. Many areas on the face and body can be treated including: eye area, jowls, jaw-line, neck, décolleté, area around mouth, abdomen, arms, knees, and thighs. Pain-free and no “down-time”. Results can be enjoyed after even 2 sessions although 4-6 sessions are recommended.

Fee: $250-1,750

Fractionated Laser Resurfacing
The “gold standard” when it comes to treating fine lines, wrinkles, poor skin texture, and uneven skin tone. This treatment works by removing out layers of damaged and aged skin to stimulate its replacement with newer, smoother, younger looking skin. Areas commonly treated include: eye area, lines around the mouth, full face, neck, chest, hands.

Fee: $700 and up

Sclerotherapy: Spider Vein Removal
Sclerotherapy is the most effective treatment option for the removal of cosmetically pesky spider veins on the legs or thighs. This simple procedure involves the injection of a solution into the unwanted vessels that causes them to fade over the period of a few weeks.

Fee: $150-400

Brilliant Distinctions® and Aspire Rewards Programs
Reward yourself and save by participating in the rewards programs offered that will enable you to earn points that can be applied to future treatments and product purchases.
